---

## TECHNICAL SKILLS

Ruby, Rails, SQL, Javascript, React, Python, HTML, CSS

---

## TECHNICAL PROJECTS

### HobbyLobby - [Git-Frontend](#) [Git-Backend](#)

A place to post pictures of your hobbies for others to see inspired by Reddit. Deployed using Javascript, React.js, and Ruby on Rails

- Demonstrated new skills using JavaScript and React.js
- Developed switch tool enabling a multi page website without needing to refresh

### Sports - [Git-Frontend](#) [Git-Backend](#)

Displays videos of sports and allows for users to use CRUD functionality in an organized state using Javascript, React frontend, and Ruby on Rails.

- Optimized website using single source of truth to display data from rails back-end
- Embedded media from various sources such as Youtube
- Led scrum calls with team members in order to track progress and address blockers

### HowYouFeel - [Git-Frontend](#) [Git-Backend](#)

Web app to record and save memories or feelings using Javascript and Ruby on Rails

- Developed frontend using Javascript and PostgreSQL
- Utilized Ruby on Rails for the backend to organize and pass information using single state of truth

---
